Task 1

Practice variables, input/output, and basic operations.

Task:

* Write a program that takes two integers as input.

* Perform addition, subtraction, multiplication, division, and modulus operations.

* Display the results for each operation.

Task 2

Learn decision-making structures.

Task:

* Write a program to check if a given number is positive, negative, or zero.

* Print an appropriate message.

Task 3

Understand loops (for and while).

Task:

* Write a program to print all even numbers between 1 and 20 using a for loop.

* Bonus: Use a while loop to print odd numbers in the same range.

Task 4

Introduce arrays and loops.

Task:

* Create an array of 5 integers.

* Use a loop to take input for the array.

* Find the sum and average of the array elements.
